

## DYNAMICINTEGRATOR

---

Bortell's Dynamic Integrator module is a tool specially designed to provide an interface between either an e-Commerce web site or POS (Point of sale) software products and Microsoft Dynamics GP financial suite.

Dynamic Integrator assists your business in avoiding the problem of entering data from one system into another. Dynamic e-Commerce Connect automatically updates Microsoft Dynamics GP with information captured through your e-Commerce/POS software.

Reporting and tracking becomes faster and more reliable allowing you the time to spend time on planning and business growth instead of on time consuming tasks tying stand-alone systems together.

Dynamic Integrator is specifically designed to integrate seamlessly with Microsoft Dynamics GP.

Dynamic Integrator is designed to work with the following products:-

- Volusion
- Magento
- Reactive
